Abstract (en)
[origin: EP1321834A1] An electronic timepiece (10) comprises time information generating means (A) for generating time information, information generating means for generating information (function information, warning information, etc.) other than the time information, and power-saving operation means (D) for operating the electronic timepiece in a power-saving operation state entailing lower power consumption than in a normal operation state. The information generating means or the power-saving operation means (D) is operated preferentially. <IMAGE>
