Abstract (en)

[origin: EP1321901A2] Method for controlling access to an object in which a mobile object (2) or key is used to undo or release a lock (3) when the key is authorized. Prior to contact between key and lock the key is issued a certificate by a central unit that contains a specific identify code. When the key is connected to or inserted in the lock offline authentication is based on the specific identity code in the certificate. <??>INDEPENDENT CLAIMS are made for an electronic lock system, fixed lock unit, computer program and computer program product.
