Abstract (en)

[origin: DE10048827C1] The receiver has a separating device (2), a transporter with a short first sector (20) fixed to it and at least one long second sector (30) of the transporter on a chassis (12). A first separating knife (6) runs along the first sector and over the length of the second. A second separating knife (9, 10) holds the stack of standing articles.
