Abstract (en)

[origin: WO0226193A2] The present invention relates to methods of inhibiting uterine leiomyoma proliferation and preventing formation of uterine leiomyomas, compounds and compositions that stimulate induction of the *Cyr61* gene and compounds that increase Cyr61 activity. The present invention also relates to methods of screening ligands that regulate Cyr61 protein expression. The invention further relates to methods of diagnosing patients with uterine leiomyomas associated with a downregulation of Cyr61 expression. The invention also describes antibodies and related pharmaceutical compositions.
