Abstract (en)

[origin: WO0229932A1] A pre-tailed link box comprises a housing within which one end of each of at least two cable tails (5) is terminated. The cable tails (5) connect to terminals connected to spigots (10) so as to form spigot assemblies (25). Removable links (2) can be fitted across pairs of spigots (10) so as to create connections between the cable tails (5). The link box is formed as a unitary chamber.
