Abstract (en)

[origin: EP1323812A2] The present invention discloses a lamp fuel composition for producing colored flames comprising a coloring agent, a fuel, a fuel supporter, a capillary linker and a scent and obtainable by heating the ingredients while stirring and cooling, and a method of manufacturing the same. The composition for producing colored flame can provide stably and continuously flames of different colors such as red, green, orange, yellow, blue, violet, light purple, white rose and rainbow color according to the used coloring agents, upon burning. The composition is useful as decorative illumination.
