Abstract (en)
In order to improve operation performance by simplifying switching and setting of switch operation parts such as a DIP switch (14) and to reduce the number of operation steps at the time of installation of an outdoor unit (1) of an air conditioner, a printed circuit board (11) of a switch box (10) is separated into a main board (12) and a sub-board (13), and the DIP switch (14) and the other switch operation part are mounted on the sub-board (13), whereby the DIP switch (14) and the other switch operation part can be disposed and oriented so that they are easily operated. <IMAGE>
