Abstract (en)

[origin: EP1324163A1] Method for controlling the command execution in a diary watch equipped with a number of touch sensitive sensors (C1-C7) for input of commands and data. A liquid crystal display is provided for output of diary events. The same touch sensitive sensors used for input of data and commands are used with different keystroke sequences for input of commands to those used for data input. One of the sensors (C1) acts as a validation sensor.
