Abstract (en)
[origin: WO0221749A2] A method, apparatus, and computer program product are provided for providing a personalized Web page to a user at a user terminal, the personalized Web page comprising content components derived from a plurality of distinct, separately accessible component servers. One implementation includes receiving a request for the personalized Web page, the request comprising an identity of the user and specifying first and second content components to be included in the personalized Web page; after receiving the request, issuing a first information request to a first of the component servers, the first information request identifying the first content component; after issuing the first information request and prior to receiving a response thereto, issuing a second information request to a second of the component servers, the second information request identifying the second content component; forming the personalized Web page from responses to the first and second information requests; and transmitting the personalized Web page to the user.
