Abstract (en)

[origin: WO0225947A1] The invention concerns a terminal comprising a base module (100), installed at a patient's home, equipped with a telephone link (1) with a remote medical home-service centre, said base module (100) being adapted to receive at least a complementary module (200, 300, 400) dedicated to at least one utility of the medical home-service centre, and to exchange data with said remote centre via the telephone link (1). The invention is applicable to medical home-service.
