Abstract (en)

[origin: EP1326001A1] The feed support mechanism comprises an actuating part (9) which is formed as a rotatably adjustable handle, which projects transverse to the work cylinder rotation axis (A). The handle is rotatably adjustable about the handle axis (B) and includes the entire control range of the control valve (10) within an angle of twist of 180 degrees, preferably 90 degrees. The control valve is formed as a rotary slide valve.
