Abstract (en)

[origin: WO0220224A1] The tool mounting comprises a base body (12) with means for accommodating a tool with a grooved shaft. Said base body is equipped with a locking mechanism (14, 16, 18, 20), by means of which the tool may be retained in the base body (12) and an operating element (24) for releasing the tool. A wear-resistant and easily assembled tool mounting comprises a socket shell (34) for the tool, arranged in the base body (12), made from a harder material than the base body (12).
