Abstract (en)
[origin: US2004024430A1] What is proposed is an electrically operated hair removing device, such as shaver, hair/beard clipper, epilation device or the like, having an operating system-connected to a housing-for clipping and/or plucking hair, which system has at least two operating elements which are movable relative to one another and at least one of which is driven, and having at least one illumination device for illuminating or transilluminating the operating system, the illumination device emitting stroboscopically pulsed light signals.
