Abstract (en)

[origin: WO0222935A1] A method for producing a machine module for industrial washing of textiles, in which the following are connected to each other: one or more washing machines (1, 2, 14, 15), supply water and discharge water piping (12, 22), necessary filters, control panels and a main distribution board. The washing machine(s) and the discharge water piping, filters, control panels and the main distribution board are installed in the assembly workshop on a machine base (13, 23) to form one single machine module assembly, which is transported to the site of use in a pre-installed state which has been subjected to test runs and tests beforehand.
