Abstract (en)

[origin: US6874558B2] An awning including a canvas shaft, a canvas wound onto the canvas shaft, and a sleeve enclosing the canvas shaft. A stationary support means carries the sleeve. An arrangement for adjusting an inclination of the sleeve by rotation contains one lateral sleeve carrier which is connected to a respective lateral holder and which can be rotated relative to the holder about the awning-canvas-shaft axis. An actuating element, which can be moved serves for adjusting the inclination of the sleeve.
