Abstract (en)
The invention relates to a fountain made up of a tubular column (1) which supports at least two vertically superimposed modules and chosen from among a tap module (2), an electrical feed power point module (3) and a lighting module (4). The tap module (2) is connectable to water supply means, such as a tank (5) and an electric pump (7). The electrical feed power point module (3) is fitted with means for the connection of an electrical appliance, such as a plug base (21) protected against the environment. The lighting module (4) comprises lighting means, such as a fluorescent lamp (27) with a current limiter. <IMAGE>
