Abstract (en)

[origin: EP1327962A2] The method involves receiving a sign-in message containing vehicle identification information via a telecommunications network (MFN) and evaluating the message with respect to a vehicle (A1) to be identified and a sign-in time, producing information from which an elapsed time can be determined for the vehicle relevant to payment and/or a maximum parking time and storing (PR) the information for later access. AN Independent claim is also included for the following: a server for connection via an interface to a telecommunications network.
