Abstract (en)

[origin: WO0219977A1] Disclosed is hair care kits used for warming a hair care composition before the composition is applied to the hair. One of the kits comprises (i) an aqueous hair care composition and (ii) a heat generating agent is isolated from the aqueous care composition, wherein the heat generating agent is isolated from the aqueous hair care composition. One of the heating devices comprises a heating source comprising (i) a heat generating agent which generates a heat by mixing a reacting means, and (ii) a reacting means.
