Abstract (en)

[origin: WO0115736A2] A conjugate exhibiting interferon beta activity and comprising at least one first non-polypeptide moiety covalently attached to an interferon beta polypeptide, the amino acid sequence of which differs from that of wildtype human interferon beta in at least one introduced and at least one removed amino acid residue comprising an attachment group for said first non-polypeptide moiety. The first non-polypeptide moiety is e.g. a polymer molecule or a sugar moiety. The conjugate finds particular use in therapy.

[origin: WO0115736A2] A conjugate exhibiting interferon beta activity and comprising at least one first non-polypeptide moiety covalently attached to an interferon beta polypeptide, the amino acid sequence of which differs from that of wildtype human interferon beta in at least one introduced and at least one removed amino acid residue comprising an attachment group for said first non-polypeptide moiety. The first non-polypeptide moiety is e.g. a polymer molecule or a sugar moiety. The conjugate finds particular use in therapy.
