Abstract (en)

[origin: DE10050470A1] Vertical dosing bunker (1) arranged above a dispersing head for pasted wood particles is provided with elongated flat wood particles/chips and has at least one vertical conveying shaft as a storage chamber which continuously conveys the wood chips to an application opening (24). Preferred Features: An application device in the form of a horizontal conveying path/shaft (18) or cellular wheel sluice is provided before the application opening. A vertical filling chamber (3) is provided below a conveyor (4) and comprises a vertical conveying shaft (13) or an upper rigid filling shaft (11) and a lower vertical conveying shaft.
