Abstract (en)
[origin: WO02055410A2] A tape dispenser article is provided wherein the tape dispenser article has a curvilinear tape core with side portions. The tape core may have a textured surface. Such a textured surface would permit easy removal of the end of the tape without the addition of a release layer. The core is a grid-like honey-comb wherein the effective tape surface area is defined by the size and number of open cells. The effective surface area provides similar release characteristics as a textured surface.
[origin: WO02055410A2] A tape dispenser (10) article is provided wherein the tape dispenser (10) article has a curvilinear tape core with side portions (21). The tape core (22) may have a textured surface. Such a textured surface would permit easy removal of the end of the tape without the addition of a release layer. The core (22) is a grid-like honey-comb wherein the effective tape surface area is defined by the size and number of open cells. The effective surface area provides similar release characteristics as a textured surface.
