Abstract (en)

[origin: WO0234838A1] The invention relates to a method for producing compounds with at least one urea group and at least one silyl group. According to said method, a compound with at least one amino group is reacted with a carbamate, either the compound with at least one amino group or the carbamate having a silyl group. The invention also relates to compounds produced according to this method, to the use of such compounds and to surface coating products, sealants, adhesives, assembly foams and insulation foams containing such compounds.
