Abstract (en)

[origin: WO0229936A1] The object of the invention is an electrical connector module comprising housings (16) for receiving forwardly-inserted female contacts (18), each contact comprising a forward cage (20) and a rear blade (24) provided with pins (26) to be seated on a flexible circuit (12). The object of the arrangement according to the present invention is to permit a forward mounting of the contact with an immobilization in its housing.
