Abstract (en)  
[origin: EP1329314A2] The preferably coated sleeve (2) can be slipped on and off the support mandrel (3) and is fastened by at least one fixture (5). The internal diameter of the sleeve when detached from the support mandrel is less than the external diameter of the support mandrel. The fixture has shaped elements (7) fitting into matching counter-elements (8) on the sleeve, and is in the form of a holder-ring (6) with cogging fitting axially into the sleeve's end side.
