Abstract (en)
[origin: EP1329411A1] In an elevator apparatus, a front wall of a hoistway is provided with an opening portion in which an upper portion of a landing communicates with the hoistway. A plurality of removable soundproof/fireproof covers are attached to the landing side and the hoistway side of the opening portion, respectively. A driving machine for raising/lowering a car is arranged within an installation space surrounded by the soundproof/fireproof covers. <IMAGE>
