Abstract (en)

[origin: EP1329560A2] Water fitting comprises a first pipe (1) and a rotating second pipe (2) which protrudes from the first pipe and acts as an overflow. The first pipe has a bent tubular part (12) in an upper end region and the second pipe is arranged in the tubular part so that it can move longitudinally. Preferred Features: The second pipe can be removed from the first pipe. A flexible water feed hose can be fitted to the inner end of the second pipe.
