Abstract (en)
[origin: EP1329563A1] Load distributing body comprises a load distributing plate (11), an anchoring plate (12) and anchoring rods (13). The anchoring rods are connected to the anchoring plate parallel to the load distributing plate. The anchoring plate has as many openings (15) as there are openings (14) in the load distributing plate. All the openings have the same dimensions and are located on the periphery with respect to the same positions of the axes x and y. Preferred Features: The load distributing plate has bent ends facing the anchoring plates on the ends of their largest extension.
