Abstract (en)
[origin: EP1329569A2] Production of a flooring comprises: fixing supports on a floor and adjusting to the same height; arranging gypsum plaster board in bundles to cover the floor; covering with an impermeable layer; and applying a flooring composition on the impermeable layer. A glass woven fabric is arranged between the gypsum core and the upper and lower board layers of the plaster board. The plaster board has a thickness of 15-30 mm. The plaster board has dimensions of 60 x 120 cm and is curved upward by 0.3-3 mm. Preferred Features: The glass woven fabric formed on the lower side is thicker than the glass fabric on the upper side of the plaster board. The curve is approximately 2 mm. The plaster board has a corner breaking load of at least 1000 N.
