Abstract (en)  
[origin: DE10051306A1] Gear for a motor vehicle steering assembly comprises a pinion (17) arranged on a shaft (5) so that it does not rotate, and a toothed wheel interacting with the pinion. The pinion and the toothed wheel are pre-stressed in a radial direction. The shaft is positioned so that it tilts in a radial direction. Preferred Features: The shaft is positioned in a housing (11) using a fixed bearing (9) and a detachable bearing (13). The housing has a bore for receiving the detachable bearing.
