Abstract (en)

[origin: WO0234830A1] The invention concerns a composition comprising: 100 parts by weight of a propylene polymer including: 84 to 70 wt. % relative to the total weight of propylene polymer of a propylene crystalline homopolymer (1), and 16 to 30 wt. % relative to the total weight of the propylene polymer of a propylene and ethylene copolymer (2) containing 30 to 60 wt. % of ethylene relative to the weight of the copolymer (2) and 0 to 2 parts by weight of a saturated fatty acid amide containing 8 to 30 carbon atoms.
