Abstract (en)
[origin: WO0236896A1] The invention relates to a low-energy building, especially a passive building, comprising a heat insulation system. The aim of the invention is to provide a low-energy building, especially a passive house, which is economical to produce. To this end, the invention provides that the heat insulation (2) essentially surrounds the wall, roof and floor surfaces from the outside in the form of a closed shell.
