Abstract (en)  
[origin: WO0205243A1] The invention relates to a warning device for motorists comprising a transmitting device (TRX), which is disposed for simultaneously transmitting at least one sound radio frequency range on several different frequencies stored in a frequency memory (FME). Said warning device is disposed for simultaneously emitting warning messages on several different frequencies via at least one antenna (SAN). The transmitting device can comprise several carrier generators provided with modulators assigned thereto, whereby the modulated carriers are fed to a common HF output stage (HFE).
