Abstract (en)
[origin: WO0235663A1] The present invention relates to an electrical outlet adapter (10) having a body (11) carrying a connector plug (16) and at least one outlet socket (17) electrically connected to the connector plug. According to the invention the adapter is provided with a generally elongate flat body (11) having first and second generally planar inner (12) and outer sides respectively and first and second longitudinal ends. Said connector plug is positioned on the inner side adjacent the first end or alternatively between said ends and a socket unit (18) containing at least one outlet socket is likewise positioned at least mainly on said second inner side adjacent each end or alternatively adjacent said second end.
