Abstract (en)

[origin: EP1331325A2] The mounting to fasten a profile (3,4) at a building wall has a U-shaped holder (1). The holder base plate (5) is mounted to the wall, and the two projecting holder legs lie on both sides of the profile (4), to be locked to it. A torque-free mounting is achieved by the holder legs (6) and flat leg plates (2) which grip the profile on both sides.
