Abstract (en)  
[origin: EP1331335A2] The screen (4) is joined to the bathroom wall or a second screen element (6) with hinges (2), specifically designed for a lasting smooth action. The hinges (2) are assembled of a bearing element (22,24) and a pivot carrying element (20) and facilitate the screen (4,6) to be swiveled open in two directions around a vertical axis (8). Each of the bearing elements (24) is fitted with at least one spring element (40,41) touching the pivot (36) when inserted and creating a friction between the components of the hinges.
