Abstract (en)

[origin: EP1331460A2] The invention relates to an apparatus for the continuous centrifugation, particularly for leaf foodstuffs, comprising loading means (1) for the product to be dried; discharge means (2) for the dried product; a fixed body (4), having a substantially circular shape, said body having a central vertical axis (A-A); feeding means (5) for the product to be dried, substantially in correspondence of the central axis (A-A) of said fixed body (4); a structure (6, 11) to address the product toward drying means; drying means (7) including a translating belt cage and a holed lateral surface; said drying means (7) being provided with a rotative motion about an axis coincident with said central axis (A-A) of the fixed body (4), and with a translation motion of said translating band (7), and addressing means of the dried product toward said discharge means (2) for the dried product. <IMAGE>
