Abstract (en)  
[origin: EP1201418A1] Each strip of film (30) has adhesive strips (18) on one side across its width. The strips are stacked (39), pressed in the stacking direction, and stuck together to make an object (48). A web of film (22) has adhesive strips across its lengthwise direction and is divided by cutter units (36) along its lengthwise direction into at least two webs (29) of film strip equal in width. The separate film strips are deflected and conveyed above each other to form packs (34), cut off and conveyed to the stack of film strips.
