Abstract (en)
[origin: WO0235162A1] A refrigeratory (1) for a zeotropic refrigerating agent mixture which can be used in a refrigerating device consisting of at least two refrigerating zones maintained at different temperatures, comprising two elements (2,4) placed behind each other in a refrigerating agent circuit, one being upstream (2) and the other downstream (4), in addition to a refrigerating agent collector (5). The refrigerating agent collector (5) is placed in thermal contact with the downstream element (4).
