Abstract (en)

[origin: FR2816426A1] The primary package has a label including the product brand, and the secondary packaging has a code mark (5) which enables its identification when the product is sold. An auxiliary mark with a code (6) individualizes the product in the primary package. This mark is in small characters that are illegible to the naked eye. The codes (5,6) are held in a computer database (8) to allow validation.
