Abstract (en)

[origin: WO0189061A1] The invention relates to a protecting cap, especially for generators, comprising an aspiration port (19) which is provided with an air intake opening (40), forms an air conducting chamber (22) and comprises a connector (25) for another aspiration element (28). The inventive protecting cap exhibits, at the outer periphery (46) of the connector (25), a central axis (49) having another direction than an air conduction centre line (52) in the area of the connector (25).
