Abstract (en)
[origin: EP1332848A2] An adjustable hole punch (1) has a base (2) on which a pivotally mounted actuating handle (3) is provided. There are a plurality of plunger assemblies (5) each incorporating a plunger and a co-operating die defining an aperture to receive the plunger. At least one of the plunger assemblies (5) is slidably mounted in position. A rotatable element (14) is provided mounted in a slot (13) in the base. The rotatable element is of polygonal form presenting a plurality of flat faces, each face carrying markings or indicia thereon which facilitate the correct positioning of the movable plunger assemblies. <IMAGE>
