Abstract (en)  
[origin: EP1332871A2] A typeform for printing processes with a carrier layer (1), an ink or paint transfer printing layer (2), and an intermediate layer (3) between layers (1) and (2), is new. A typeform for printing processes with a carrier layer (1), an ink or paint transfer printing layer (2), and an intermediate layer (3) between layers (1) and (2), where layer (3) on stripping (sic) is split into an upper intermediate layer (3a) and a lower intermediate layer (3b), with preservation of a bond between the lower intermediate layer (3b) and the carrier layer (1) and between the upper intermediate layer (3a) and the printing layer (2) is new. An Independent claim is also included for a process for preparation of the typeform involving initial preparation of intermediate layer (3) as a strip, and lamination with carrier layer (1), coating of intermediate layer (3) onto carrier layer (1), followed by either preparation of printing layer (2) as a strip and lamination with layer (3), or coating of layer (2) onto intermediate layer (3).
