Abstract (en)  
[origin: EP1332973A1] A carton (10) which may be ideally used as a gift box comprises a folded carton contained within the lid (40) which ultimately closes the carton. The carton is formed from a blank having four panels (12,14,16,18) which form the sides of the carton. Four end panels (32,34,36,38) connected to the side panels may be folded together to form a bottom for the carton when in its assembled condition. The entire carton blank is folded to fit inside the lid (40). A transparent wrap, preferably a shrink wrap encloses the carton and any other wrapping paraphernalia within the lid. <IMAGE>
