Abstract (en)

[origin: EP1332976A1] An apparatus for handling and stocking an airtight container (1) is disclosed. By means of a component (101) made of monolithic plastics, it is ensured that a sealing gasket is kept squashed, a new handle system (107) is introduced and makes the manual handling easier, a product integrity check system is inserted. The application is adapted for stocking and handling products belonging to the "general line" category. <IMAGE>
