Abstract (en)
A rolling mosquito net for frames provided with foldaway guides, characterized in that it includes in combination: a mosquito net (12) that can be self-rolled into a suitable lateral, vertically disposed rolling-shutter box (1), and is provided with a stationary upper guide means (4) and a movable lower guide means (11) able to be folded away into a control bar handle (10) operated by the user during the mosquito net rolling step and to project outside of such control bar handle during the mosquito net unrolling step, thus ensuring a correct positioning of the unrolled mosquito net (12) and to reduce the overall dimensions of the guide means when the mosquito net is in its rolled position within box (1). Said foldaway guide means consists essentially of a chain (11) with an end hinged to a stationary support (7) integral with a housing seat (1S) placed at the lower end of the box.
