Abstract (en)  
[origin: WO0239086A2] A sensor (10) for detection of an analyte, such as glucose, in a fluid, such as blood or other body fluid, is formed by printing components of the sensor, such as electrodes (24, 26, 28), and a sensing element (18), which contains an oxidorectase enzyme, such as glucose oxidase, on a suitable support (12). In one embodiment, the support comprises the wall (100) of a catheter (102), which is inserted into a patient's body.
