Abstract (en)
[origin: WO0236229A1] This invention refers to the solution of a set of constructional elements, a basic element (1) of which is formed by a flange with external walls in the shape of an equilateral octagon. There are central projections (12) formed on a smaller circle and circumferential projections (13) on a greater circle in the octagon corners on the upper side thereof. The connecting elements formed on the lower side consist of a cylindrical wall (14) and stiffening ribs (15) having slots (16) formed at the octagon peaks.
