Abstract (en)
[origin: US2004028443A1] A printing device is usable to print a material which is bent around a printing cylinder. The printing device includes a plurality of print heads and a print head holder. The print head holder positions the print heads in a common holder plane which is defined by the holder. The print heads are disposed in a row that is inclined relative to the printing device at an acute angle. The print heads are also inclined relative to the holder plane so that they are directed at substantially a right angle to the material to be printed.
