Abstract (en)  
[origin: WO0185500A2] The invention relates to a heatable washer system (10) for vehicle windscreens, comprising at least one spray nozzle (16), which is supplied with water for washing by a pressure valve (38) and whose housing (40) is connected to a water pump (20, 58) by a water line (14). Said water pump conveys washing water from a reservoir (12) to the spray nozzle (16). A heating device (18) is situated in said reservoir (12). According to the invention, the water line (14) has two channels (26, 28), one (26) of which is connected to the pressure side of the water pump (20) and the other (28) of which is connected to the reservoir (12).
