Abstract (en)  
[origin: WO0234632A1] The invention relates to a roll container comprising a carriage (1) and a box (2) to be placed on this. The carriage has holes (8, 9) and/or brackets (10, 11) and the box has holes (6, 7, 25) corresponding to these. The roll container has one or more separate intermediate bases (3), which are quipped with intermediate base brackets (4, 5) or intermediate base holes (12, 13) corresponding to the holes and/or brackets of the carriage. The carriage (1) and the box (2) can be fastened to each other by lowering the box (2) onto the carriage (1) and the intermediate base (3) onto the box base (2b) so that the brackets (4, 5, 10, 11) engage the holes (6, 7, 8, 9, 12, 13, 25).
